

HomeWorks **QS**

Unparalleled Total Home Control

Discover Total Home Control

Ideal for existing homes or new construction, HomeWorks QS provides sophisticated control of your surroundings, every hour of the day.

HomeWorks QS, designed for exclusive homes, seamlessly integrates the control of electric lights and daylight, as well as integrates with audio/visual, security, and HVAC systems.

When you choose HomeWorks QS, you're investing in a system that will redefine your way of living.

We believe total home control can set the mood for a better life. Let us show you how.

Light Control

Create just the right light for any activity or set moods in specific areas of your home—all at the touch of a button.

Shade Control

Use the sun to your advantage with automated shades. Convert harsh glare into soft, pleasing light, while preserving your view.

Temperature Control

Adjust heating or cooling systems any time of day, even while you're away from home.

Appliance Control

Conveniently turn off standby power to small appliances, such as audio/visual equipment and computers.

Audio/Visual Control

Control audio/visual equipment from one convenient location.

Energy Control

Save energy throughout your home without sacrificing comfort or convenience.

Experience the Benefits Room by Room

By customizing the system for the way you live, you'll find the unmatched energy savings, convenience, ambiance, and security that comes with total home control.

- 4 | Benefits of HomeWorks QS Room by Room
- 24 | Shade Styles and Fabrics
- 26 | Controls and Styles
- 28 | Control Colors and Finishes

Entry, page 4

Save energy by setting back the temperature and lowering lights before you leave for the day. When you come home, brighten exterior lights with a single button press.

Kitchen, page 6

Dim lights, lower shades, and adjust temperature with the sleek Architrave keypad. Or adjust lights and shades to set the mood for a quiet dinner.

Butler's Pantry, page 8

Dim lights to create an atmosphere for entertaining. With HomeWorks QS, you can dim all types of lighting, including LED sources.

Breakfast Nook, page 10

Add layers of light to a room with automated shades, while also increasing privacy and enhancing security.

Family Room, page 12

Use temperature control to help save on heating and cooling costs throughout your home.

Wine Cellar, page 14

Use the "All Off" button to ensure all lights in a room are off after an evening spent with friends. Create a lighting scene for specific events, such as hosting a wine tasting.

Bedroom, page 16

Turn all of your house lights off with a single button press from the comfort of your bed. You can create the ideal light for reading or watching TV, too.

Bathroom, page 18

An occupancy/vacancy sensor automatically turns lights off when you leave the room, saving energy. Other controls, such as dimmers and shades, let you create soft or task lighting, depending on your needs.

Terrace, page 20

Dim outdoor lights for grilling or relaxing in your hot tub, with a single button press.

Away from Home, page 22

Check the status of and adjust lights, shades, and temperature, from around the block or around the world.

coming home

Walking into a dark house is a thing of the past with HomeWorks QS. When you arrive home in the evening, all you'll need to do is press a single button before you even get out of your car to brighten key entry points, as well as specific exterior lights. Your home will always feel welcoming with HomeWorks QS.

Use the "Away" button on a keypad to save energy by **setting back the temperature and adjusting lights and shades** when you won't be home for a long period of time.

You can also save energy with the timeclock, which can **automatically dim landscape lighting** at night, and turn it off at sunrise.

Palladiom keypad in Satin Nickel

in your kitchen

Your kitchen is the heart of your home. It's the place where you start your day with an espresso and the morning paper or create your signature dish. Here, you can brighten recessed ceiling fixtures and under-cabinet lights for cooking, then adjust island lights to a more subdued setting for dining.

Sleek and narrow, the Architrave keypad is ideal whether you want your wall controls to blend in or stand out. **This keypad fits where wider keypads do not**, including millwork and other door jambs.

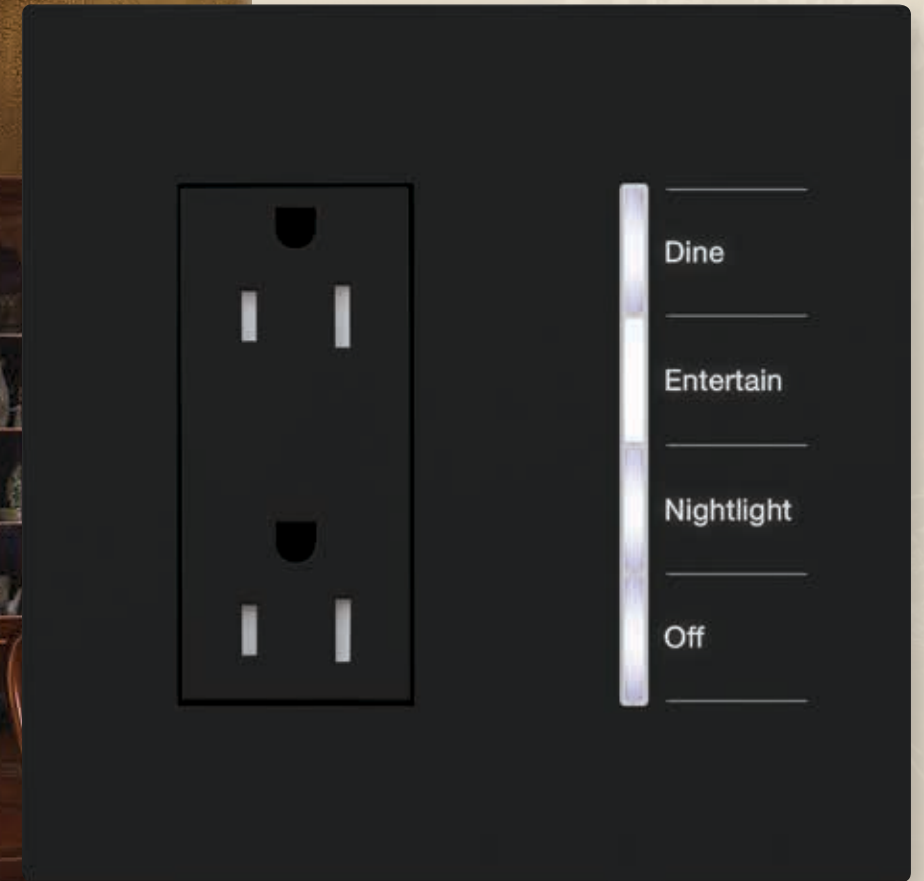

Architrave Narrow in
Bright Brass

Accessories like receptacles and phone and cable jacks come in a range of colors including warm earth tones, so it's easy to **complement any room's aesthetics.**

And because you can dim all types of lighting with HomeWorks QS, including energy-saving LED sources, you can create ambiance no matter what type of bulb you use.

in your butler's pantry

Attention to detail is a must when getting ready for a party. Brighten lights in your work area while you prepare drinks and hors d'oeuvres, while keeping lights dim in other rooms until your guests arrive.

New Architectural accessories in Black

in your breakfast nook

Being able to create varying levels and layers of light allows you to give each room—or spaces within larger rooms, such as your breakfast nook—its own look and feel. Having layers of light also allows you to showcase interior design—highlight artwork, architectural details, collections, or specific pieces of furniture.

Automated shades are a convenient way of managing daylight in a room, as well as an effortless way to conserve energy. Shades help **lower cooling costs in summer and heating costs in winter**, and can be adjusted based on natural light levels when used with the Radio Window sensor.

Radio Window sensor

Shades also help protect furnishings from harmful U/V rays. (Our custom-made window treatments are available in a variety of styles, fabrics, and materials.)

Architectural seeTouch keypad in Antique Brass

You can also have your shades programmed to adjust their height based on the time of day, so they're always at the appropriate height to either let the sun in or block it out.

The perfect complement to light and shade control, temperature control helps you **save on heating and cooling costs.**

Architectural seeTouch keypad and seeTemp wall control in Black

in your family room

Being able to adjust light is also about increasing your comfort level. Too much sunlight during the height of the day can be harsh and glaring. With one button press, you can lower shades to block the sun's rays, while preserving the view outdoors.

in your wine cellar

If your wine cellar is one of the main architectural features in your home, you'll want to accentuate it with outstanding lighting. Press a button on the keypad located on the exterior of the room, then enter as the lights gradually rise, casting a warm glow and highlighting your extensive collection.

Presentation matters.

You can create “scenes” with HomeWorks QS—preset light and shade levels that you can recall at the touch of a button. For example, press the “Tasting” button on your keypad, and lights and shades will adjust to create a presentation that’s every bit as exciting as the wine selection.

When the evening winds down, press the “All Off” button to ensure no lights are left on during the night.

Signature Series seeTouch keypad in Antique Brass

in your bedroom

The best way to start your morning is by waking up to a soft, gentle light.

What makes your morning even better is that you don't have to get out of bed to control that light. With a HomeWorks QS tabletop keypad on a bedside table, you can adjust lights—and shades—from the comfort of your bed.

Before you retire for the night, **turn all the house lights off** with the “Goodnight” button. Not only can you control the lights that surround you, but also the lights halfway across your house—so you can rest assured no lights are left on, wasting energy. And with an appliance control, you can completely turn off standby power to your TV—which also saves energy.

RF seeTouch tabletop keypad in Midnight

in your bathroom

Controls in your bathroom give you the ability to create a spa-like atmosphere—the perfect setting for a soothing shower or for softening the transition into your morning routine.

An occupancy/vacancy sensor is ideal for rooms where lights are often inadvertently left on, such as a bathroom. When paired with a dimmer, you can set the lights to turn on at a specific level and then adjust them accordingly. The sensor automatically turns lights on when you enter the room, then **turns them off when you leave.**

GRAFIK T dimmer in Clear Glass

Radio Powr Savr occupancy sensor

on your terrace

Your terrace is simply an extension of the interior of your home—the place where you go to slow down and live in the moment. All the more reason the lighting in this area should be as versatile as it is in your interior rooms. Adjust lights for grilling on a warm summer evening or relaxing next to your firepit on cooler nights. Accent foundation plantings and water features, such as fountains.

Carry the Pico **wireless control** with you for a convenient way to dim exterior lights, or create pathways of light throughout your property for increased safety and security—all with one touch.

4-button Pico wireless control with custom engraving in White

away from home

You can always stay in touch with your home, whether you're enjoying an evening out or are gone for an extended period of time. Make sure shades are lowered and lights are off while you're not there. Before you return, adjust the thermostat so the temperature is just right when you walk through the door.

Integrate HomeWorks QS with your mobile device, and you can **easily check the status of your lights, shades, and HVAC** when you're away from your home, with the Lutron Connect app.

Other app features include:

- **Arriving/Leaving Home functionality.**

Automatically adjusts lights, shades, and temperature when you enter or leave a predetermined area. This feature can also send notifications to your phone asking you to

confirm if you would like to adjust your system (such as activate your "Away" scene).

- **Keypad Builder and Level Editor.**

Keypad Builder allows you to easily adjust your system's keypad, timeclock, and thermostat programming. Level Editor lets you create new light and shade scenes on your own.

- **HomeGlance and Widget support.**

Easily access your favorite scenes from your mobile device.

Amazon Alexa

Sonos Wireless Speaker

You can also add voice and audio control into your system by incorporating other connected home solutions, such as Amazon Alexa and Sonos.

Shade Styles and Fabrics

Choose from roller, honeycomb, and tensioned shades, wood and horizontal sheer blinds, Roman shade systems, and drapery track systems.

Our custom-made window treatments are available in a variety of sheer, translucent, blackout, light-filtering and room-darkening fabrics. We also offer stained woods for wood blinds.

Roller Shades

Our roller shades complement both traditional and contemporary designs, and are available in different sizes to accommodate the needs of any room. (Battery-powered options are available.)

Honeycomb Shades

Honeycomb shades add luxury to a space with their elegant textures, as well as depth, thanks to their cellular design—which also provides superior insulation. (Battery-powered options are available.)

Horizontal Sheer Blinds

These shades pair the soft elegance of a sheer with the precise control of a blind. Sheer layers also offer privacy, even when vanes are open.

Tensioned Shades

Our tensioned shades provide solutions for skylights and angled windows. They reduce light gaps around fabric and maximize the view when opened by eliminating cable guides that are typical in skylight shades.

Drapery Track Systems

Choose from traditional pinch pleat or ripplefold draperies or the Kirbé vertical drapery system, which smoothly pulls fabric up and completely out of the way.

Roman Shade Systems

Roman shade systems allow for more reliable, smoother, and virtually silent shade movement of Roman shades.

Wood Blinds with Independent Lift and Tilt

Wood blinds are an attractive and effective way to ensure privacy, while still allowing sunlight to filter into a space. Only Lutron wood blinds with Independent Lift and Tilt can offer precision alignment of both tilt and lift position between multiple shades.

Control Colors and Styles

Choose from Architectural, New Architectural, and Designer keypad styles, a variety of keypad button configurations, and faceplates in an assortment of colors, finishes, and materials.

Please note that colors and finishes are representative and not exact matches. To order a color sample please call Lutron Customer Service at 1.888.LUTRON1.

The Lutron difference

Since Lutron's inception over 50 years ago, we have developed a peerless reputation for quality and service—and for putting you, the customer, first.

Because we have the highest confidence in the quality of our products, we back HomeWorks QS with an 8-year warranty. And our technical specialists are available 24 hours a day, seven days a week at 1.800.523.9466.

When you invest in Lutron, your light levels will always be constant, thanks to our patented RTISS (Real Time Illumination Stability System). Your shades will move quietly and precisely, for exceptional daylight control. Our products are designed and rigorously tested to survive extreme electrical conditions, such as power surges and lightning strikes, so you can count on them to always work. And with Clear Connect RF technology—our latest advancement in reliable radio frequency communication—you can use HomeWorks QS in your existing home or new construction.

We're also committed to saving energy. Since 1961, we've been designing industry-leading technology that saves energy and reduces greenhouse gas emissions. No matter where our products are installed, they save energy by reducing electrical consumption. Taken as a whole, Lutron lighting controls save nearly 10 billion kWh of electricity a year, while also reducing CO₂ emissions.

We are proud to be the provider of lighting controls for the White House, the Statue of Liberty, the Guggenheim Museum in Spain, Louis Vuitton Stores, and many others.

To learn more about our company and our products, please visit lutron.com/homeworksqs or call **1.888.LUTRON1**.
